

Erik Green

Software Developer
Climate Change Science Institute
Environmental Sciences Division
Oak Ridge National Laboratory

Erik is a software developer in the Atmospheric Radiation Measurement (ARM) Data Archive. He develops and maintains code in Python, C, and Unix Shell. He is responsible for facilitating the curation of scientific data by writing new programs, trouble-shooting and fixing existing programs, and analyzing and improving system processes. He has previous experience as an Unix systems administrator and spent several years working in Japan.
